## Work Experience

**Software Engineer at 100Devs | Los Angeles, CA**
*January 2022 - Present*

- Collaborated with a team of developers to build modern and responsive web applications using best practices.
- Built semantically structured full stack web applications.
- Applied agile methodologies like SCRUM for project management.

## Recent Projects:

**Black Koffee (Full Stack Web App)** - Cashier can take orders from customers with their names. Baristas can login to the app and see orders that have been made and mark them as complete. Orders that have been completed will note which barista completed the order.

**Smiley Notes (Full Stack Web App)** - Users can login to their profile and find their list of notes. They can add new notes through an input, which they can then edit or delete all notes in their profile.

**100Hours Project** - Users can submit memorializing information to database for lives and loved ones lost during the Liberian Civil Wars between 1989-2003. Users can create an account and login to update a memorial entry with additional photos and memorializing stories to uplift the memory of the lost. The Liberian Civil Wars resulted in the destruction of many cemeteries. This digital memorial serves as a war-resistant means of remembering the lost.
